

Dear Students,

We are thrilled to extend a warm invitation to all university students to participate in the upcoming Scientific Students' Conference scheduled for November 21, 2023, next Tuesday. This exciting event will be a celebration of knowledge, research, and innovation, showcasing the remarkable work of our fellow students.

Event Details:

- **Date:** November 21, 2023, Tuesday
- **Time:** 8:00 – 12:00
- **Venue:** Böszörményi street campus, see details below

Program Schedule: see below and attached

We will have presentations from students, covering a diverse range of topics in various fields of science. This conference is a unique opportunity for you to engage with your peers, gain insights into cutting-edge research, and foster a spirit of intellectual curiosity.

In addition to the local presenters, we are honored to have international students sharing their research findings. Their contributions promise to provide a global perspective and enrich the overall experience of the conference.

International Students and Their Research Titles:

1. Al-Sallami Ali Salah Wadday - Understanding the Physiology and Consequences of Negative Energy, Balance in Ewes: Implications for Sustainable Sheep Farming- 2 nd year, Animal Husbandry Engineering MSc Student - 9:00 a.m. - lecture hall 146 in building A
2. Emilia Vasilova - Toxoplasmosis in small mammals, clinical signs and diagnosis - from the University of Veterinary Medicine and Pharmacy in Košice - 11:40 a.m. - lecture hall 146 in building A
3. Martin Batkovký - Effect of different fertilization methods and maceration of grapes on the quality of white vine – from the University of Veterinary Medicine and Pharmacy in Košice – 9:40 a.m., lecture hall 7 in building A
4. Ademola Blessing - Monitoring of maize field under precision irrigation - a Hungarian case - 2 nd year, Agricultural Environmental Management Engineering MSc student 9:00 a.m. - room 26 in building N
5. Nadya Nurul Amalina - Investigation of the effects of variable pH & CO2 injection on the biomass growth of *Chlorella vulgaris* for sustainable microalgae cultivation - 2 nd year, Agricultural Environmental Management Engineering MSc. student 10:00 a.m. - room 26 in building N
6. Nguyen Thi Y Nhi - Interaction impact of drought stress, nutrient deficient water and seed-borne pathogen (*Alternaria alternata*) on germination and vigor of two tomato varieties - 2 nd year, Plant Protection Engineering MSc student - lecture hall 4 in building A
7. Lucia Krupašova - Wild life rehabilitation - the most common cases in birds entering rescue center - from the University of Veterinary Medicine and Pharmacy in Košice – 10:20 a.m. – lecture hall 3 in building A

We encourage all students to take advantage of this exceptional opportunity to broaden their understanding of current scientific advancements, engage in meaningful discussions, and network with like-minded individuals.

Please note that on this day, **there will be no regular classes to ensure that everyone has the chance to participate in this enriching academic experience.**

Your presence and active participation will contribute to the success of this event, making it a memorable and inspiring day for the entire university community. We look forward to seeing you at the Scientific Students' Conference on November 21, 2023!
